(57) Abstract

PROBLEM TO BE SOLVED: To provide a printing order accepting placing system by which a complicated proof sheet is unnecessitated, image data is easily transmitted from an ordering side, information on a printer and cost or the like is accurately imparted to the ordering side and color correction is made possible.

SOLUTION: In this system for accepting/placing orders for the printing of color image data by using terminals 1 and 2 connected to a network, color image data to be printed is transmitted from the terminals 1 and 2 of ordering side which have an image editing function to the terminal 4 of order accepting side, the color image data is received by the terminal of the order accepting side, the proof sheet data generated by the order accepting side is transmitted to the terminals 1 and 2 of the ordering side, and the proof sheet data is confirmed and altered between both the terminals 1 and 2 and 4.
